

## **INFECTION PREVENTION AND CONTROL SERIES**

# **COVID 19 NEW NORMAL: PREVENTING INFECTION SPREAD IN PERSONAL AND PROFESSIONAL SPACES**

**July 4, 2020 - 3 pm to 4.30 pm**

### **Context**

COVID 19 pandemic has brought unprecedented human and humanitarian challenges. Many people rose to the occasion and acted swiftly to safeguard others around them and migrated to the NEW Normal Ways to prevent further spread of infection. Even then there are many doubts and concerns regarding the safety of our environment – be it our workplace, our children’s educational institutes, in handling food and understanding isolation and quarantine. People are often following the safety measures taken by their neighbours, friends and relatives irrespective of their scientific basis and rationality. With the immense rapid increase in COVID 19 Cases, relaxed government restrictions, workplaces partially open, there is a feeling of fear, worry, confusion and uncertainty about living life and ways of living. This webinar deals with industry experts sharing key safety measures to be taken for preventing spread of COVID 19 infection in our personal and professional spheres, based on the recommended guidelines. Further emphasizing on how risk assessment and management is a key driver for bringing changes and adapting new measures.

### **Programme Objective:**

1. To reduce ambiguity and bring clarity on the safety measures to be taken in the personal and professional spaces for preventing infection spread based on recommended guidelines on COVID 19 pandemic.
