

Online Training Programme on Enterprise Risk Management

(September 21 - 30, 2020)
(Duration: 15 hours)

PROGRAMME OVERVIEW

The increased volatility and uncertainty in the external business environment has significantly increased the risks facing an organisation. Consequently, proactive management of risks is crucial for survival, especially in view of the increase in corporate collapses that have taken place in the past decade.

Thus, in the increasingly uncertain environment marked by political crises, regulatory changes and price volatility, a deep understanding of the risks faced by an organization is essential. Academic research shows that organizations that have proactively formulated risk management strategies have been able to successfully mitigate the risks. It is therefore important that organisations enable their executives to develop skills in identifying, measuring and managing the risks.

Traditionally, risk management was confined to functions such as corporate treasury, safety, project risk management, etc. However, over the last decade, enterprise-wide risk management (ERM) has been gaining momentum and various proponent frameworks have evolved, such as COSO/ERM Cube, ISO31000:2009, AS/NZS 4360, etc. ERM advocates for an aggregate, coordinated and portfolio theory approach to managing risks.

PROGRAMME OBJECTIVES

The proposed programme will introduce participants to the key concepts of ERM. The programme aims to develop the skills of the participants in measuring risk exposure and managing it through latest frameworks for enterprise-wide risk management and hedging strategies.
