

Dear Friend,

The ASCI is an independent, autonomous and self supporting public purpose institution. The College has a strong heritage and enjoys a high reputation for its impartial and dispassionate opinion and studies. It is essentially an institution for practicing managers and administrators (government, public & private) and over the last 59 years more than 1.30 lakh managers and administrators have passed through its portals.

The domain expertise of ASCI focuses on combining post experience management training and programmes with innovative and creative intellectual leadership in evolving public policy. We have robust research and advisory activities for governmental Organisations, public sector undertakings, corporate sector and international agencies.

Our highly talented and experienced faculty will lead the Management Development Programmes for 2017-18. Distinguished guest speakers having domain expertise invariably share their rich experiences and knowledge with participants and are an integral part of our Programmes. We constantly focus on empowerment of practicing managers in improving their skills and leadership qualities. Our endeavour is to be pragmatic and innovative for attempting practical solutions anchored in ground realities.

We warmly welcome all our stakeholders including individuals, national and international Organisations to partner us in contributing to the achievement of our goals of being a Centre of Creative Leadership through learning.

R H Khwaja, IAS (Retd)

Director General
