Prof. V.Srinivas Chary
Programme Director

June 18, 2018

Dear Sir/Madam,

The Administrative Staff College of India (ASCI) is pleased to announce a three (3) day training programme – **Towards Zero Waste Management – Decentralized Solid Waste Management** from **July 23-25, 2018**. There is a paradigm shift in solid waste management practices across the world where cities are adopting 'No waste to landfill' strategy. Solid Waste Management (SWM) Rules 2016 notified by the Ministry of Environment, Forests & Climate Change also advocate decentralized SWM to minimize waste sent to the landfills.

It is in this context that Environment Managers need to understand various components of decentralized SWM.

It is requested that suitable participants be nominated for the programme. A brochure is enclosed with more details of the training programme.

Thanking You

V. Srinivas Chary

Training Programme on

Towards Zero Waste Management- Decentralised Solid Waste Management (DSWM)

July 23-25, 2018

INTRODUCTION

The Administrative Staff College of India (ASCI) announces a training programme on **Towards Zero Waste - “Decentralised Solid Waste Management”** during **July 23 - 25, 2018**. The programme aims to build on the momentum generated by the **Swachh Bharat Abhiyan (SBA)** which has created an environment conducive to implementing of sustainable & participatory initiatives in waste management at the grass roots. Towards **Swachh Survekshan** programmes too have created sufficient interest amongst public representatives, Government functionaries & citizens at large.

CONTEXT

Solid Waste Management (SWM), which is a key component of SBA, has come to occupy strategic environment space in the present day world. With increasing population, the quantities & types of waste generation, the subject of waste management has become quite challenging. World over different methods have been tried to handle waste. The results are there for all of us to see. In an environment that sees climate change & Global warming stare us in the face, it is pertinent to note that the developed economies are moving towards a “No Waste to Landfill” strategy.

It is in this context that Environment Managers need to look at decentralized SWM practices as sustainable alternatives. The SWM Guidelines 2000, though issued with good intent have not made a significant difference on the ground. The SWM rules of 2016 notified by the Ministry of Environment, Forests & Climate Change, makes out a case for implementable strategies and advocates Decentralised waste management systems, thereby moving in the direction of Zero Waste Management Systems.
