INTRODUCTION

Environmental Impact Assessment for developmental projects helps in addressing the environmental aspects in a proactive way during the project life cycle - site selection, construction and operational stages. EIA is to give the environment its due place in the decision making process by clearly evaluating the environmental consequences of the proposed activity before action is taken. The key objectives of good EIA report are:

- ◆ To present to the project proponent and decision makers a clear assessment of potential impacts
- ◆ To ensure that potential environmental problems are foreseen and avoided at an early stage in planning cycle so as to preempt problems
- ◆ Early identification and characterization of critical environmental impacts allow the public and the government to form a view about the environmental acceptability of a project and what conditions should apply to mitigate impacts

REGULATORY FRAMEWORK

Recognising the need for environmental appraisal for certain developmental projects, the Ministry of Environment, Forest & Climate Change, Government of India had promulgated regulatory framework under the provisions of Environmental (Protection) Act 1986.

EIA Notification 2006: Environmental appraisal is made mandatory for certain developmental projects. The listed projects are required to prepare EIA document and undergo public consultation process. Also, ministry in the recent times communicated Zero Draft Notification 2019 to the State Government and SEIAA, for their feed back.

OBJECTIVES OF THE PROGRAMME

- ◆ To enhance the knowledge on environmental appraisal and to update on the latest protocols of the Ministry

- ◆ To enhance the knowledge on EIA report - baseline data, aspects, mitigation planning and additional studies.
- ◆ To enhance the knowledge on reviewing the EIA report for its adequacy

STRUCTURE OF THE PROGRAMME

Regulations: Due diligence on applicable regulations, norms and protocols is one of the key factor in the preparation of the EIA Report and to establish that the proposed project meets the regulations. Current Practices and Procedures related to obtaining Environmental Clearance.

Baseline Data: Planning for baseline data collection of various environmental aspects. Type of data to be generated and reporting for better appreciation and use in the decision making process.

Aspects and Mitigation Planning: Identification of sector specific aspects and addressing through mitigation planning.

Additional Studies: Identification and planning for site specific and project specific studies.

Case Studies: Participants will be provided on hand experience on "How" and "What" to review "EIA Report" for its adequacy through group discussion and presentation.
