# AI for Decision- Making and Governance

November 10-12, 2025

## PROGRAMME OVERVIEW

The rapid advancement of Artificial Intelligence (AI) and Business Intelligence (BI) is reshaping decision-making across industries. This programme offers a comprehensive introduction to AI, machine learning, and deep learning, emphasising their applications in data analysis, automation, and predictive modelling. Participants will learn to leverage AI to analyse large datasets, streamline business operations, and forecast emerging trends.

Through hands-on training with industry-leading tools and AI-driven analytics platforms, participants will gain practical data visualisation and real-time analytics expertise. The programme also explores AI's expanding role in governance, finance, and business intelligence, equipping learners with the knowledge to implement AI-driven problem-solving and operational optimisation strategies.

By the end of the programme, participants will have the skills to effectively utilise AI and BI tools, enabling them to make data-driven decisions, enhance operational efficiency, and drive innovation within their organisations.

## OBJECTIVES
